

- Digital Commercial Grade
- Engineering Grade Prismatic
- High Intensity Prismatic
- High Intensity Translucent Film
- High Intensity Prismatic Fluorescent

## Reflective Film

Our high intensity prismatic grade (HIP) utilized advance micro-prismatic technology. It has excellent retro-reflective performance, with reflectivity up to 360 cd/lux/m, and more than 10 years lifespan.

Engineering grade has outstanding digital printing, UV printing and screen printing capability, also best value for money. It is perfect for temporary roll up warning signs and construction zone devices.
